

PHILANTHROPY GOAL:

CF is an inherited disorder caused by having two abnormal copies of the CF gene.

Having CF feels like breathing through a straw due to the mucus buildup clogging the airway and lungs.

There are close to 40,000 children and adults living with cystic fibrosis in the United States (and an estimated 105,000 people have been diagnosed with CF across 94 countries), and CF can affect people of every racial and ethnic group.

There is currently no cure ...

HELP MAKE CF STAND FOR CURE FOUND!!!

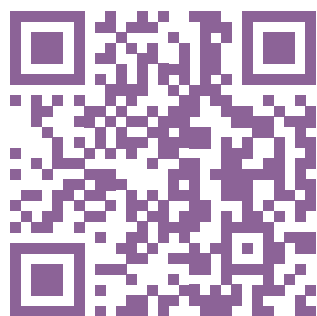

65 ROSES

Donate

As the leading donor to the Cystic Fibrosis Foundation, Delta Phi Epsilon has set a goal to raise 20k through this year's Gala. To donate, or to learn more information about our philanthropy, scan the QR code below!

Thank
You

65 Roses Gala

"The '65 Roses' story dates back to 1965, when an observant 4-year-old, hearing the name of his disease for the first time, pronounced cystic fibrosis as '65 Roses' " - CFF
Join us for live music, dancing, catered food, and a silent auction, all dedicated to raising money that gets us closer to "CF" standing for "Cure Found"

7pm-11pm

Ventanas, ATL — November 16th
